

A horizontal bar chart comparing the Average Coverage of 10 methods across 10 datasets. The x-axis represents Average Coverage, ranging from 0 to 1500. The methods are color-coded: purple, blue, cyan, green, yellow, orange, and red. The datasets are grouped by color: pink, blue, green, yellow, orange, and red. The chart shows that the purple method consistently achieves the highest coverage across most datasets, often exceeding 1000. The other methods show varying levels of coverage, with some methods (like the red one) generally performing lower than others.

Dataset	Method 1 (Purple)	Method 2 (Blue)	Method 3 (Cyan)	Method 4 (Green)	Method 5 (Yellow)	Method 6 (Orange)	Method 7 (Red)
Pink	1250	520	580	350	150	100	50
Blue	1000	520	700	350	150	100	50
Green	1050	400	350	250	150	100	50
Yellow	750	350	250	150	100	50	20
Orange	1150	500	600	350	150	100	50
Red	1150	400	550	250	150	100	50
Pink	1400	550	1050	400	150	100	50
Blue	1050	400	650	250	150	100	50
Green	1150	350	550	250	150	100	50
Yellow	1400	550	1100	400	150	100	50
Orange	1050	400	650	250	150	100	50
Red	1150	350	550	250	150	100	50
Pink	1200	350	550	250	150	100	50
Blue	800	400	550	250	150	100	50
Green	550	250	150	100	50	20	10
Yellow	300	150	100	50	20	10	5
Orange	300	150	100	50	20	10	5
Red	300	150	100	50	20	10	5
